Dear Tolgahan,

Thank you for your request. We don't have a campus in Portugal. Our closest campus is in Madrid, Spain: <http://www.cordonbleu.edu/lcb-madrid/en>

Thank you.
Kind regards,
Margaret Warren

thanks for your answer...but there is something wrong i dont know but i would like to share it with you...it may be very important....

Actually i m from Turkey. I asked about lisbon cordon bleu culinary education because of we have one chef in Turkey who is saying and showing to people his education from lisbon le cordon bleu i think year is around 1998 and as he is telling in his biography that he has came back to Turkey in 2001 i thing after his graduation....

You may have any school or campus in that time in lisbon, portugal or this guy is saying something different that we could not understand? his name is rafet ince you may search from his name...

i request it because i want to go same school like him but as you say you don't have any school there....So could you search about it? is there any graduated person who has name as RAFET İNCE from Turkey from any le cordon bleu program i don't know which cordon bleu but i think you must have system for searching your students for all over your school. He is telling like that and i wanted to apply same school that's why i try to get info about le cordon bleu in lisbon....

and i attached one photo please check it there is uniform that is showing his name and le cordon bleu logo and wrote name of le cordon bleu lisbon

best regards

Dear Tolgahan,

Thank you for your information.

Your email did not come to my Inbox but I found it. However, the attachment was not included. I don't find a Rafet Ince in our database. Could you please resend the image?

We don't have a school in Lisbon. Occasionally, Le Cordon Bleu offers workshops in many countries where we don't have schools, but don't issue chef jackets at these workshops.

Thank you.

Kind regards,
Margaret Warren

sure I will sent pictures again please check attachment... and if you want you can check from his website that is <http://www.en.chefrafetince.com/>

if you chose english and if you click on the tab and left side chef's biography link... you will see his biography as english. You will see he is saying there I got master degree for 4 years at le cordon blue college of culinary....but in english part you can not see which cordon blue if you click turkish and if you come same part you will see there he is saying lisbon. Also out of this website I see him another areas he is telling I finished le cordon blue lisbon...these pictures which were sent by me on the attachment I captured from his website if you check website you will see same pictures there....

I just wanted to get information about his school that he claims to finish it...but if there is something wrong, I have to get it and I have to tell to people truth but together I don't want to accuse him for nothing. If he is truth you can tell me if he is not, you can explain to me and we should not let him deceive the people and get advantage by using your name which is le cordon blue one of the most popular name about culinary all over the world....

by the way you did not find his name in your database but I want to make sure this database is general right? not for usa or another country? is that database for all over your school?

I request to give me more clear and sure information....and that way if I claim something against to him, my informations must be clear, sure and very dependable to do it and I make to publish this thing as a news at popular news websites about culinary in Turkey if he is lying. But if he is not, I don't want to judge him for nothing as I said before ...

I don't know if he is using name of le cordon blue without finishing the school that can be illegal so as

you are le cordon blue you must have rights about it and you can look for your rights if he is wrong... Unfortunately some people are using fake cv documents and school education diploma and when they make job application for any company in their country or for abroad most of these companies do not search they are saying right or not...I don't say this guy is like that person but there are so many that kind of people. so we should not have tolerance for that kind of people because of they are getting advantage and they get one step forward from the other people even they have fake and unsuccessful past but they are showing that like very successful and received document from most popular schools or companies. That makes other real people down who has really success and then that kind people becoming up....

So please investigate for me and for justice about it....

thank you so much
Sincerely

TOLGAHAN GULYİYEN
